EXPERIENCE

Full-Stack Developer Intern   Idotinc, Perundurai, Erode
Apr 2022 - Present (2 yrs)
- With my best performance, I gained valuable experience and knowledge.
- Worked with the MERN stack (MongoDB, Express.js, React.js, Node.js) to build dynamic and scalable web applications.
- Project and development flow planning. Putting together one's own development team. It has given me a new perspective on the development process.

– I enjoyed my development role at this company, where I spent 2 years developing web apps.

PROJECTS

CodeEvent   Jan 2024
Coding-Club Event Website
- Created a platform facilitating student event registration and access to past event data, alongside staff capabilities for event posting and monitoring of student registrations.
- Stack used - ReactJs, ExpressJs, NodeJs, MongoDB

KEC Website   Sep 2023
Kongu Engineering College website
- This site was built with modern and user-frienzdly interface to showcase the institution's offerings and facilitate seamless navigation for visitors
- In this project, I concentrated entirely on application's design aspect.
- Stack used - HTML5, CSS3, Bootstrap, JQuery

PNA Inventory   Aug 2023
Inventory Management Website
- Developed an Inventory Management System using PHP and SQL. This system facilitated inventory tracking, stock level monitoring, and report generation.
- In this project, I concentrated entirely on the application's Log aspect.
- Stack used - PHP, MySql

RPS Game   Jan 2023
Rock Paper Scissor Game
- Created a simple Rock Paper Scissors game using Python, allowing players to compete against the computer.
- Implemented game logic to handle player inputs and computer selections, determining the winner based on the classic rules of Rock Paper Scissors.
- Leveraged Python's random module to generate computer choices dynamically, ensuring unpredictability and excitement in each round.

NextFolio   Feb 2024
Personal Portfolio
- Designed and developed a sleek and responsive portfolio website using React.js, Next.js, Tailwind CSS, and Framer Motion.
- In this project, I focused on both the design and development aspects, ensuring a seamless user experience across devices.
- Leveraged React.js and Next.js for efficient component-based architecture and server-side rendering, enhancing performance and SEO capabilities.

EDUCATION

Kongu Engineering College   2020 - 2025
Master of Science in Software Systems   TamilNadu, India
- **Cum GPA** : 8.6 / 10 till 7th semester

AREA OF INTREST

- Front-End Development
- UI Designing
- Automation
- Back-End Development

TECHNICAL SKILLS

Frontend : HTML, CSS3, Tailwind, Javascript, ReactJS, NextJS
Backend : MySQL, PHP, Node.js, Express.js, MongoDB, Firebase
Programming : C, C++, Java, Python
Tools : Figma, Adobe PS, Git, Postman, Docker, UIPath, Selenium, Netlify / Vercel
Soft Skills : Positive Mindset, Self Confidence, Communication, Team Work
